Community Supplies

- Paper towels, Clorox wipes, and tissues. (These are much appreciated. Thank you!)
- These will be needed throughout the year, especially in the middle of winter ,and when your child has allergy sniffles in the spring.
 - ❖ Please find some way of labeling all materials as yours before you get to school; the more permanent/prominent, the better.
 - ❖ Do not bring all your things at once. If you lose one pencil, it is much easier to replace than an entire pack. Keep your things secure and only bring in what you need.
 - ❖ Having your things organized before you get here would be great.
 - o Set it up so you can place any paper into your things and know what subject it is and if it is complete or not.
- Then, have a system for handing in work that is complete so you do not forget to do so.
